Manufacturers of wire and cable products have unique and complex material requirements. M. Holland offers a wide variety of plastic compounds, gels, tapes and copper conductors to meet the industry’s diversified needs, allowing us to be a single-source supplier.

Beyond the distribution of materials, we offer expert process support to assist our clients in the manufacture of their products to meet industry specifications. We also provide a range of testing and application development services at our dedicated M. Holland Technical Services Laboratory. And because our materials ship from seven strategically located warehouses throughout North America, we help keep the supply chain reliable.
