

## Color & Compounding Line Card

We take **color & compounding** personally.

We know how critical color and appearance can be in successful product marketing. That's why M. Holland provides clients with industry intelligence on changing trends so that we can advise them on the best color solution for their application.

Our product and technical expertise enable us to reduce complexity and act as a true strategic partner. We analyze more than color, evaluating aesthetic engineering options, competitive value and lead time within the supply chain. By combining this expertise with a sizable portfolio of in-stock products, we help you focus on what you do best: making customized products quickly.

Similarly, your clients demand complexity and flexibility in compounded products, delivered in less time. Our geographic coverage, robust inventory, and ability to customize help ensure you get the material you need — rapidly and reliably.
